## ScHOOLSET <br> benefits and play ideas <br> 

Just Blocks SCHOOLSET is an educational material which aims to inspire children to creative play and can significantly enrich the curriculum at schools and kindergartens.

The blocks have a modern design and architectural features which encourage to plan, build and support spatial imagination at every stage of a child's development.

Each play differs and each building is very unique

They are in line with various educational approaches such as:

Montessori, Waldorf, Reggio Emilia, STEAM and traditional education

They are attractive to all children, at different ages and development stages

$\square$

They are dedicated for both open-ended play which encourages children to experiment and constructive play focused on a particular final result

They teach group work, sharing resources, problem solving, making choices and taking decisions

They support imagination through play without additional sound or light effects, exercise mimic, voice and correct articulation

They support independence and building self-esteem and confidence in being one of a kind

They exercise fine and gross motor skills, engaging all body muscles

They are a useful material to help with sensory stimulation

They help children to name and understand emotions and coping with them

Inspire both girls and boys to play they are gender neutral

They help children to complete projects, introduce constructive

They are natural product and kids have an opportunity to smell, touch and play with sustainable wood

Produced in EU using high quality materials and laboratory tested, in compliance with the highest
toy standards

Greatly support 'no planet B' philosophy.
Our aim is to sensitise children to the beauty of nature so that one day they can protect it.

##  <br> FAMOUS TOWERSS

where: London/ UK height: 96.3 m
stairs: 334 premises: 1200

height: 330 m
completed: 1889
material: stee|
material: white marble

where: Pisa/ Italy
height: 54.98m
deviation: 5m

Divide the children into three groups. Each group has to build a different famous tower and label its height.
Children should take initiative to decide if they would like their towers to be coloured or not and adjust the tower's design according to their preferences.

## 

## SUBPIECT:

## COLDSSEUM

Where: Ancient Rome
When: 70-72 to 80
The author: emperors Vespasian and Titus

J

## height 48.5m

circumference 524 m

- underground corridor system

Purpose:

- amphitheatre
- shows and games
- gladiatorial combat
- hunting
- castle

How would you design this building today?
Be inspired by the ancient architecture, remember about greenery, eco-friendly elements and the inhabitants.
Through the use of colours, make the building even more attractive.

## SCIENCE

 SUBJIECTT: ANIMALIS

TRSK
Match the animals to the continents on which they live.

Choose and build animal, then find 5 interesting facts about it and present them to the class.

##  <br> 

## 

## SUBJHCTI: IMAGHNATHON

## Let children take the lead, setting goals! <br> without taking charge or

- allow children to discover things for themselves
- instead of instructing them observe them being lost in the activity, exploring and experimenting

## SCHOOLSET

3
